## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 7 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 7 directs to information *and* a medium. Since the information do not provide any functional interrelationship to the medium for controlling the medium to reading and access the information from the medium , or impart to any software and hardware structural components to perform a function that is processed by a computer , the information themselves can not make them statutory . See MPEP 2100. The recitation “ wherein the management information ...management information ” at the last three lines is an intended use since there is no recitation in the claim to specify how the video management information file from the disc is read out to control recording, playing back or editing the A/V file. Further, it is noted that claim directs to information on a disc, not to a information recording/ reproducing apparatus . It is suggested that “An information recording disc “ lines 1-2, needed to be changed to -- An information recording/reproducing apparatus comprises an information recording disc -- to overcome the 101 rejection .

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2621

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-4, the last line, there is no antecedent basis for "said disk representative picture . Is "said disc representative picture " referencing to a disc representative picture recorded on the disc or to a disc representative picture has been read out for decoding . Therefore it is not clear how a disc representative picture on a disc can be decoded .

Claim 5-6 are indefinite as being a hybrid claim. Claim recites a medium to store with information and method for recording the information however, claim do not provide any and connection and support between a medium and method since the claim do not provide any steps of generating , forming and recording an A/V file .

***Allowable Subject Matter***

5. Claims 3-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2621
